

## Controlled Substance Legislation Alerting Service

Globally controlled substance legislation varies from country to country. This is especially true in Europe and North America. Keeping track of what is considered controlled or not is a daunting challenge for any company shipping chemicals globally.

Scitegrity have a range of tools to help with this:-

**Controlled Substance Legislation Alerting Service** – E-mailed alerts whenever new controlled substance legislation adds rules of substances as controlled. Prices start from £500 per year. For a limited time only users of this service can also submit small lists of compounds for determination.

**Controlled Substances Squared (CS<sup>2</sup>) Enterprise** – On premises software that can automatically determine the controlled status of millions of compounds structurally, across dozens of countries, with full context on why and how they are controlled. Unlimited users.

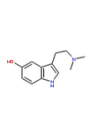

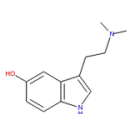

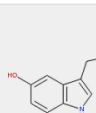

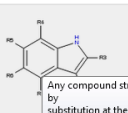

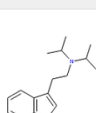

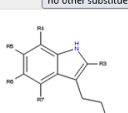

**Controlled Substance Squared (CS<sup>2</sup>) Hosted** – A cloud based version of CS<sup>2</sup>, licenced on a per user basis, able to rapidly determine the controlled status of compounds structurally across dozens of countries and hundreds of laws. Prices for this start from £5000 per year.

\*All prices exclude VAT or relevant local sales taxes where applicable.

CS<sup>2</sup> has been developed in conjunction with the Pistoia Alliance and several leading Pharmaceutical companies.

As of February 2015 CS<sup>2</sup> currently covers:- UK, USA (inc ITAR, CCL, ARCOS and CSA), Canada, China, India, France, Ireland, Germany, France, Netherlands, Italy, Spain, Belgium, Switzerland, Denmark, Sweden, EU Precursors and the United Nations INCB lists and the Chemical Weapons Convention.

CS<sup>2</sup> Search Statistics (all Jurisdictions) - Number of Input Substances = 299 Number of Matched Substances = 141
